

their destinies through full participation in this republic.

Well, it's hard to believe that it has taken them 76 more years—and fourteen more Presidencies—to earn a place of dignity for these three women who fought valiantly for that right . . . three women who changed America—Susan B. Anthony, Elizabeth Cady Stanton, and Lucretia Mott.

But the day has finally arrived and I am extremely pleased to help celebrate their long-overdue "change of address", one that is fitting for the accomplishments they bestowed on a grateful nation. There is no question about the symbolic importance of their new home. The Rotunda is the epicenter, if you will, of our American democracy. The Rotunda is "the symbolic and physical heart of the United States Capitol", according to the Architect of the Capitol.

What that means is simply this: what adorns the Rotunda matters. And having this statue here will matter to the throngs of Americans who come to Washington to be inspired by its symbolism. It will matter to the young girls who tour the Capitol and ask of the significance of these heroines. And it matters that visitors from the furthest flung reaches of the globe leave with no doubt about the importance we place on the participation of women in the greatest democracy that this world has ever seen.

The Rotunda's gilded halls will now not only reverberate with the images of our forefathers, but with our foremothers as well. Granted, the statues and monuments that have inhabited the Rotunda are of great men whose words and actions bequeathed a nation and people who today stand alone at the summit of civilization.

But we also know that women have played their roles in reaching the summit, as did these three women—Susan B. Anthony, Lucretia Mott, and Elizabeth Cady Stanton—in dedicating their lives to getting women into voting booths and out of the shadows of civic life. How could we do no less than to fight to bring their memory out of the shadows of the Crypt? After all, if we are to celebrate all that women have accomplished in America, we must celebrate those who gave life to our dreams. If we are to appreciate all that we have, we must appreciate those who fought for our opportunity to have it. And if we are to exercise our rights with strength and wisdom, we must understand that they came to us not by entitlement but by struggle.

As we bring the likenesses of these women into the light of day, so too do we take a step toward bringing history into the light of truth. Because for too long, women were the forgotten lines in the narrative of humankind. As these great ladies finally receive the recognition they have earned, let their spirit inspire us to honor and study other heroic women in history who also deserve recognition—like Sojourner Truth, who spoke so eloquently for African-American women. Indeed, it is my sincere hope that Sojourner Truth will soon join these ladies in the Rotunda where a woman of her courage and stature belongs.

Truth and her remarkable story also highlights the importance of the effort that has begun to create a National Women's History Museum. When you consider that we have memorialized Archie Bunker's chair and Norm's bar stool in a museum in the Nation's Capital—and I think that's fine—it's not unreasonable to think that there should be a place in Washington to memorialize all that women have contributed to America.

That's why I spearheaded a letter last month to President Clinton, signed by 20 of

my Senate colleagues, urging him to establish a Task Force responsible for developing such a museum. This museum will ensure that women's accomplishments are never again relegated to the cellar of the annals of history.

So let us celebrate today and honor these three great American women. They had courage. They had tenacity. They had strength. And they've certainly had patience.

It's been 76 years since our country began to fulfill Susan B. Anthony's vision of "Men, their rights and nothing more; women, their rights and nothing less". It was the first dramatic step toward the realization that a country founded on the vestment of power in the people would not survive if over half those people were silenced. Let the story these women have to tell be silenced no longer. Let everyone who passes through this grandest of buildings forever hear their voices, and be inspired by lives led in pursuit of justice.

#### MEMORIAL TO KRISTY DANIELLE VAUGHN

• Mr. ALLARD. Mr. President, Kristy Danielle Vaughn, daughter of Gary and Kelli Vaughn, of Joes, Co, was a promising young student about to report for duty this month at the United States Military Academy at West Point. She had been nominated for an appointment there by former U.S. Senator Hank Brown and myself when I served in the U.S. House of Representatives.

She was a leader in her high school government, 4-H Club, sports, and school organizations, and received numerous awards in all areas. With all these responsibilities, she also gave much of her time to the duties of her family's farm. This bright young woman was suddenly killed in an auto accident recently as she was on her way to the All State Basketball finals in Greeley, CO.

Kristy very actively contributed her time and talents to her school and her community. She will be greatly missed in Joes, and her opportunities and contributions at West Point will never be realized. •

#### TRIBUTE TO THE COMMUNITY OF MATTAWA, WA

• Mr. GORTON. Mr. President, last weekend, I had the opportunity to spend time along the banks of the Columbia River in the town of Mattawa, WA. I held a field hearing there to explore various proposals to preserve a stretch of the Columbia River's pristine beauty, and to ensure that one of our State's great natural assets remains protected.

The community of Mattawa opened its doors to me, to my staff, and to all of those who testified at and attended the public hearing, which attracted nearly 1,000 people. I want to thank the people of the community who so generously welcomed us, and worked so diligently to ensure that our hearing was a success. Without their attention to de-

tail and enthusiasm, such civil discourse in so comfortable a setting would not have been possible. We could not have asked for finer hosts.

Our public hearing was held at the Saddle Mountain Intermediate School, in Mattawa. I would especially like to thank Dr. Bill Miller, superintendent of the Wahluke School District for all of his efforts on our behalf. Also, I would like to thank all of those in law enforcement, the school staff, and the volunteers who made our hearing such a success:

Mattawa Mayor Judy Eссор; Ms. Luz Juarez-Stump, Saddle Mountain Intermediate School principal; Ms. Karen Hilliker, Saddle Mountain Intermediate School secretary; Mr. Mike Holland, Middle School principal; Mary Jane Holland, Wahluke School District staff; Mr. Steven Buckingham, teacher and advisor for the class of 1998; Ms. Lark Moore, Ms. Polly Weeks and Ms. Marlene Bird, staff for the Wahluke School District; Students from the Wahluke High School class of 1998, who provided us with wonderful refreshments; Andrea Eckenbuerg, chairwoman of the parent volunteers; Mr. Scott Egan, technical director for the school; Mr. Tim Schrag, maintenance supervisor; Chief of Policy Randy Blackburn and Chief Criminal Deputy Bryan Pratt who coordinated security for us.

These individuals made our visit comfortable and enjoyable, and I hope some day soon to be able to return to this beautiful, friendly part of our State.

Thank you all. •

#### TRIBUTE TO DR. JOHN MATHER

• Mr. SARBANES. Mr. President, it gives me great pleasure to rise today to recognize Dr. John Mather, a senior astrophysicist from Hyattsville, MD, who works at the nearby Goddard Space Flight Center [GSFC] in Greenbelt, MD. Dr. Mather has risen to the top of his field and was recently elected to the National Academy of Sciences for his distinguished and continued groundbreaking achievements in the area of original research.

As a senior Astrophysicist at Goddard, Dr. Mather serves as a Study Scientist for the Next Generation Space Telescope, which will be a successor to the Hubbel Space Telescope. He also serves as chair of the Anomaly Review Board for the HST NICMOS Instrumental as PI for the ARCADE/DIMES mission studies, as PI for a Long Term Astrophysics grant for the study of the anisotropy of the cosmic IR background, as well as other projects that will advance science well into the next century.

Since joining NASA in 1974, Dr. Mather has received a number of commendations and awards for his cutting edge work in the demanding field of astrophysics. Among his accomplishments are the Group Achievement
